

Stuck In A Box

Summary: You're trapped in a box, and your campers must find and rescue you!

Number of staff required: 1

Props/Materials/Costumes:

Two two-channel radios

Hammock village box

Master Key

Prep done:

Put both radios on channel two and turn the volume of one up all the way and place it on the floor in the middle of the cabin

Execution:

Once the radio is in the cabin and on, walk far enough away from the cabin so they cannot hear you when they talk. Over the radio say "Pssssttt, wake up! Wake up!" a couple times over and over. Instruct them on how to use the radio and to respond if they are awake.

Once they reply, tell them to get their shoes on and come help you—you were kidnapped and put inside the box and they need to rescue you, and be speedy because you are scared! In the meantime you are walking swiftly to the Hammock Village box. Unlock the box and shut yourself inside it. (For an added challenge, you can have someone else help you get in and lock it from the outside.)

Based on their age, you can give them appropriate hints for them to find you, such as "I hear goats around me and I'm in a dark place," etc. until they find you. Once they get to the box, they open it up and find you!
